Figure 1: A schematic diagram of the experimental setup for the study of the effect of the initial concentration of the polymer solution on the morphology of the polymer film. The diagram shows a cross-section of a polymer film on a substrate. The film is divided into two regions: a top region labeled 'Polymer solution' and a bottom region labeled 'Substrate'. The top region is further divided into two sub-regions: 'Polymer solution' and 'Polymer solution'. The bottom region is labeled 'Substrate'. The diagram illustrates the process of polymerization and the resulting morphology of the polymer film.
